Security Tips for Safe Login

Online betting accounts involve real money transactions, so security should always be a priority. Follow these best practices:

- Never share your username or password with anyone.
- Avoid logging in on public computers or shared devices.
- Always log out after completing your betting session.
- Enable two-factor authentication (if available).
- Regularly update your password.

Being cautious will help you protect your account from fraud or hacking attempts.

Staying Logged In vs. Logging Out

Some platforms offer a “Remember Me” option during login. While this feature is convenient, it is recommended to use it only on personal devices. On shared or public devices, always log out manually after your session.
